Hello Camille, Steve, Amy, and Supervisor Pine,

On behalf of my family and a number of the neighboring families who live on New Brunswick Drive near the Chamberlain Group projects on Cowpens Way and Cobblehill Place, I'd like to agree with Dave Michaels, and mention that the ground-shaking construction noise lately has been very disruptive, especially because so many of us still work from home. Last week there were four heavy equipment vehicles including 2 backhoes working on the Cowpens house. We've been subjected to construction noise from these projects for almost two years(!) now, and it doesn't make sense that such major work is still occurring two years into the project timeline.

Regards,
Tom Finke

Dear Staff, Supervisor Pine (and neighborhood Bcc'd)

There has been a backhoe or other earth mover driving across Cobblehill and New Brunswick between the subject lot on an ongoing (and at times near-constant) basis. For example, dozens of times today alone. Between lots 9/10 to lot 11, it drives backwards.

Does the permit allow for this kind of ongoing use of the roads between the subject lots?

Is this safe?

Is this necessary?

Is there a reason a second backhoe can't be used instead, in order to avoid this excessive road use and noise?

Thank you for your time and consideration.

Very truly yours,
Dave
