<ul style="list-style-type: none"> • Early Terminations: 11 • Normal Terminations: 4 			

In the reporting period, we filed a total of thirty-eight (38) revocations. PRCS had all thirty-eight (38) revocations. Of the revocations, there were twenty-four (24) New Law Violations. The breakdown by violation category is below:

Violation Type	PRCS	MS	% of Q1 Revocations
Violent Felonies per PC § 667.5(c)	0	0	0%
Serious Felonies per PC § 1192.7(c)	1	0	2%
Other Crimes	23	0	61%
Technical Violations	14	0	37%
Total	38	0	100%

Generally, the population is reoffending by committing crimes similar to those for which they are on Realignment, namely non-serious, non-violent, non-serious sex related crimes.

Thirty-seven percent (37%) of revocations were for technical violations. Technical violations of supervision are filed when supervisees abscond or fail to abstain from substance use. It is important to note that the Probation Department usually files formal revocations after lower sanctions have been attempted, including flash incarcerations for PRCS cases. However, at times, officers may decide that a formal revocation is more appropriate than utilizing lower sanctions, depending on the circumstances of the violation. Sixty-three percent (63%) of revocations filed were for new law violations involving property, drug/alcohol related crimes as well as other crimes.

There were five (5) **flash incarcerations** during this reporting period.

Six (6) cases were **transferred** to another county for supervision.

REALIGNMENT BULLETIN CY2025 Q3: JULY TO SEPTEMBER

Executive Summary:

This quarter there was a notable shift in the offenses committed by the supervised and in-custody realignment populations in San Mateo County. Historically, this population commits property crimes. Drugs & Alcohol (23%) and Buying/Receiving Stolen Vehicle (13%) were the top offenses in Q3, 2025. This quarter, July through September, 2025 (Q3), a range of miscellaneous offenses emerged as a top offense, along with Assault offenses.

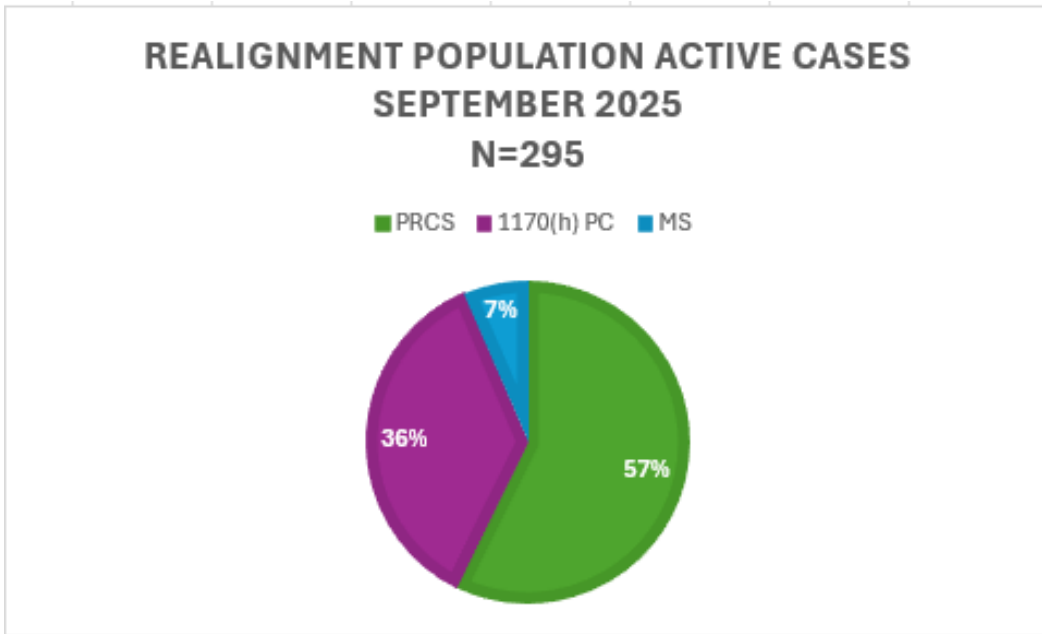

Overview:

During Q3, Drugs & Alcohol (23%), Buying/Receiving Stolen Vehicle (13%), Miscellaneous (13%), Assault (10%), Grand Theft (7%), and Burglary (8%) were the top committing offenses for the realignment population (this includes the new supervised cases and in-custody realignment offenders). Please note, "miscellaneous" refers to a number of assorted offenses that do not amount to any one category. These offenses include but are not limited to: oral copulation with person under 16, resisting an executive officer, attempted reckless burning, violation of court order and shoplifting. Overall, the total realignment population during Q3 decreased by 4.88% compared to Q3 in 2024.

The data used for this analysis was derived from information provided by the San Mateo County Probation Department and the SMCSO Corrections Division.

FISCAL YEAR 2024-25 FOURTH QUARTER
SUMMARY REPORT NARRATIVE

SAN MATEO COUNTY HEALTH

BEHAVIORAL HEALTH & RECOVERY SERVICES

Please Note: The BHRS Service Connect Dashboard is presented one quarter in arrears to present accurate data because submission deadlines are too soon after the quarter close.

AT-A-GLANCE: All Time Total BHRS Referred, Served, Number of Services

The total number of participants referred to BHRS for treatment since July 1, 2017, is 3,498; of these, 2,026 entered treatment and/or recovery plans. (Participants served by BHRS is a lower number than those referred because not all assessments result in treatment). The total number of Service Connect services—including both mental health and substance use treatment services—provided to participants since the inception of the program is 29,681.

Open Service Connect Cases with a Service

This graph represents total Service Connect participants that received at least one BHRS service. The numbers do include participants that continued from quarter to quarter, so a participant could be counted more than once in each quarter if their case was open across multiple fiscal quarters. The Q4 count is 106, which indicates a return to numbers at the beginning of the year.

Engaged Participants with Four or More Services in a Year

“Engaged” is defined as a participant receiving four or more services, meaning the participant has returned to BHRS for multiple appointments for different services, demonstrating the participant is engaged because they actively participate. Engagement has been increasing over the year and peaked in Q3. Engagement rates tend to increase for multiple quarters after the reporting period, as service data becomes more complete.

Percent of Participants with Substance Abuse Recovery Plan or a Mental Health Treatment Plan

This graph presents the percentage of participants who had a mental health treatment plan or a substance abuse recovery plan. Substance abuse recovery plans are historically at a rate of two to one as compared to a mental health treatment plan. However, AOD treatment plans this quarter continue to be higher than that ratio, which represents a significant trend.

Living Situation Upon Program Admission and Discharge

This graph shows the living situations of participants at the time the participant was admitted to the program and then the living situation when discharged from the program, for participants who were discharged in the reporting period. The purpose of this measure is to monitor the service impact on improvement of the living situation of the participant. Q4 shows there was no change in the collective living situations of the participants who were discharged during this reporting period, compared to their living situation at admission.

Total Individuals Referred to Service Connect and Total Admitted for Services

Not all individuals referred to the program meet the assessment criteria for admission to the program, so this graph measures the difference between the number of persons referred and the number that are admitted and served for each quarter. The results for Q4 demonstrate a large increase in referrals, with a slightly smaller increase in the number served.

Sexual Orientation and Gender Identity (SOGI) Data

BHRS collects SOGI data in five categories at admissions and across the life of a case to inform other levels of government of the needs of all populations. Q4 Sexual Orientation shows five reporting as Bisexual, two as Lesbian/Gay, and one as Other. Two participants indicated their pronouns are They/Them. These continue to be high counts for both categories.

Correctional Health Services (Unavailable)

Previous counts represented the participants who were screened, medically treated, and referred for mental illness and substance abuse treatment by Correctional Health. Due to a staffing change and transition to a new electronic health record system, this data is no longer available and will need to be re-defined.

Service Connect Cases with PES Counts

A Psychiatric Emergency Services (PES) count is when a Service Connect participant has presented themselves at PES. Those participants that were not admitted are shown as a “visit” and those admitted are shown as “inpatient.” Involvement with PES is only counted if enrolled in Service Connect—counts do not include episodes when subject was not a participant in Service Connect. Q4 showed a slight decrease in PES visits and increase in hospitalization.

BHRS is continuing to review and improve data methodology for this report.
