FILED ENDORSED IN THE OFFICE OF THE COUNTY CLERK RECORDER SAN MATEO COUNTY CALIF

NOV 18 2025

MARK CHURCH, County Clerk By KAMILLE SANTOS

This is to advise that the County of San Mateo has approved the above (Lead Agency or Responsible Agency)

described project on 11/12/2025 and has made the following determinations regarding the above described project.

- 1. The project will not have a significant effect on the environment.
2. An Environmental Impact Report was prepared for this project pursuant to the provisions of CEQA. A Negative Declaration was prepared for this project pursuant to the provisions of CEQA.
3. Mitigation measures were made a condition of the approval of the project.
4. A mitigation reporting or monitoring plan was adopted for this project.
5. A statement of Overriding Considerations was adopted for this project.
6. Findings were made pursuant to the provisions of CEQA.

This is to certify that the final EIR with comments and responses and record of project approval, or the negative Declaration, is available to the General Public at: See address above; or online at https://www.smcgov.org/publicworks/2023-slip-out-repair-near-1780-higgins-canyon-road

Project Description:

The proposed project consists of road repairs, bank stabilization, and habitat enhancement along the southwestern bank of Mills Creek adjacent to the northeastern side of Higgins Canyon Road in San Mateo County. Approximately 110 linear feet of creek bed, 185 feet of creek bank, and 180 feet of roadway have been eroded and require repair. The objective of the Project is to repair the damaged road and restore the bed and failed bank of Mills Creek. The proposed Project involves: 1) an approximately 192-linear-foot-long soldier pile retaining wall, 2) an approximately 185-foot, biostabilization-based bank repair (soil lifts and vegetated boulder revetments), 3) approximately 110 linear feet of engineered creek bed to restore the channel to its pre-erosional original flowpath, and 4) reconstruction of approximately 180 linear feet of failed roadway within the existing footprint to restore the travel lane and shoulder area. The project would remove approximately 2,116 square feet of the asphalt from the existing compromised roadway on the northeastern edge of the road where it is affected by the slip-out. This would be replaced with approximately 4,556 square feet of new asphalt, including the failed pavement area. The finished roadway would be restored to its original width of approximately 20 feet wide.
