Re: Seal Cove Surface Drainage Study

Dear Property Owner/Resident:

The County of San Mateo Department of Public Works (Department) is proceeding with the Seal Cove Surface Drainage Study (Study). The Department has retained BKF Engineers to begin field investigation and surveying activities in your neighborhood as part of the planning for the Study.

Over the coming weeks, you may see survey crews, engineers, and other authorized personnel working throughout the area. These activities may include:

- Performing topographic surveys to document existing ground elevations and features.
- Locating and documenting existing infrastructure, including utilities, drainage facilities, roadways, sidewalks, and other public improvements.
- Marking utilities, survey control points, and other features with temporary paint, flags, stakes, or other survey markers.
- Collecting field measurements, photographs, and other information necessary to support project planning and design.

Project Updates During Construction

We will be posting periodic updates and information during the Study, which will be posted on our website, as follows:

- Web Link: <http://publicworks.smcgov.org/>
- Click on "Projects" near the top of the page.
- Next, click on "Our Projects"
- Next, click on "Seal Cove Surface Drainage Study"
- Or use the QR Code on the right to access the Project webpage
