

## Voluntary Restrictions on Flight Training Procedures

The County has worked with representatives from the San Carlos Airport Pilots Association, the Federal Aviation Administration (FAA) and the communities surrounding the San Carlos Airport to establish Noise Abatement Procedures in an effort to minimize noise impacts from aircraft over-flights. These groups have worked together to find a balance between the sometimes-competing needs of airport neighbors to enjoy a reasonable level of peace and quiet in their community with the federally guaranteed right of pilots to utilize public airports. These procedures were updated in 2001 with the cooperation of the San Carlos Pilots Association to include the following voluntary restrictions on practice and flight training procedures:

**On Weekdays:** No touch-and-go, low approach, or full stop-taxi back operations on Weekdays during the period from **two (2) hours after sunset** of one day until 8:00 a.m. on Monday through Friday; and until 9:30 a.m. on Saturday. (Sunset times are averaged on a monthly basis to the nearest half hour for the purposes of these restrictions)

### 2018 CALENDER YEAR
