Cisco App View Window

3. When launching the Cisco AnyConnect Secure Mobility Client, you will need to enter the **Hostname** of the County of San Mateo VPN Appliance:

۲	Cisco Ar	yConnect Secure Mobility Client		×
		VPN: Ready to connect. gateway.co.sanmateo.ca.us	Connect	
×,	≯ (i)			1.1 1. 15C0

Manually enter the hostname gateway.co.sanmateo.ca.us and Click Connect.

4. Click the Connect button to login to the County VPN Appliance. You will be asked for your credentials. Provide your **Username** and **Password** that were sent to you via email.

🕙 Cisco AnyCon	inect   gateway.co.sanma	x		
Please enter your username and password.				
Username:	<your username=""></your>			
Password:	********			
	OK Cancel			

Login through the Cisco AnyConnect Secure Mobility client.

5. When the appropriate credentials have been provided, you will receive a Welcome message. A few basic links may have been sent to you, additional links may be best secured through your local IT staff or Departmental contact. If you are using a County provided system, you should be able to launch any local applications. Please note that these applications may require unique Usernames and Passwords separate from your VPN account credentials.

Additional help can be provided by calling the ISD Help Desk at (650) 363-4108.

Cisco AnyConnect		
UNAUTHORIZED ACCESS IS STRICTLY PROHIBITED. This computer system is provided for authorized use. All computer systems may be monitored . The County-AnyConnect profile is in use		
Accept Disconnect	~	

When you see the Banner, you have successfully connected through Remote Access.

## Changing your Password

Once connected to the county, the password can be changed at the following link:

http://security1.co.sanmateo.ca.us

6. Once connected, you will see an active VPN connection by an icon in the System Tray:

Cisco AnyConnect icon in System Tray

Locate the System Tray from the Desktop

- 7. To terminate your VPN connection, there are a couple of methods.
- a. Right-Click the System Tray Icon

Disconnect through the System Tray.

c. Another way to close the application is to double-click the System Tray icon. This will re-open the main application window. From there simply click the Disconnect button. Once disconnected, you can close the window to exit the application.
