- The people who live in the community
- Other

Interview Analysis

What do you think is the most effective way for young people to get involved with climate change?

(83 responses)

- Get educated: Learn more about the issue, read newspaper articles, do school projects, etc.
- Advocate directly: Attend community meetings, participate in marches, w...
- Start a conversation: Talk to parents, friends, teachers, religious leaders,...
- There aren't effective ways for young people to get involved.
- Other

Incentives

- Students need to learn about what causes global warming.
- Bbq picnic to educate teens

What we saw on the field trip

EPA charter school, PG&E, Houses, Roads, churches

If SLR this is what would happen:

What we value about EPA #2

We live here

Childhood memories

Latin American, Food, Party, Strong community, and celebration

African American, working class, and people are friendly

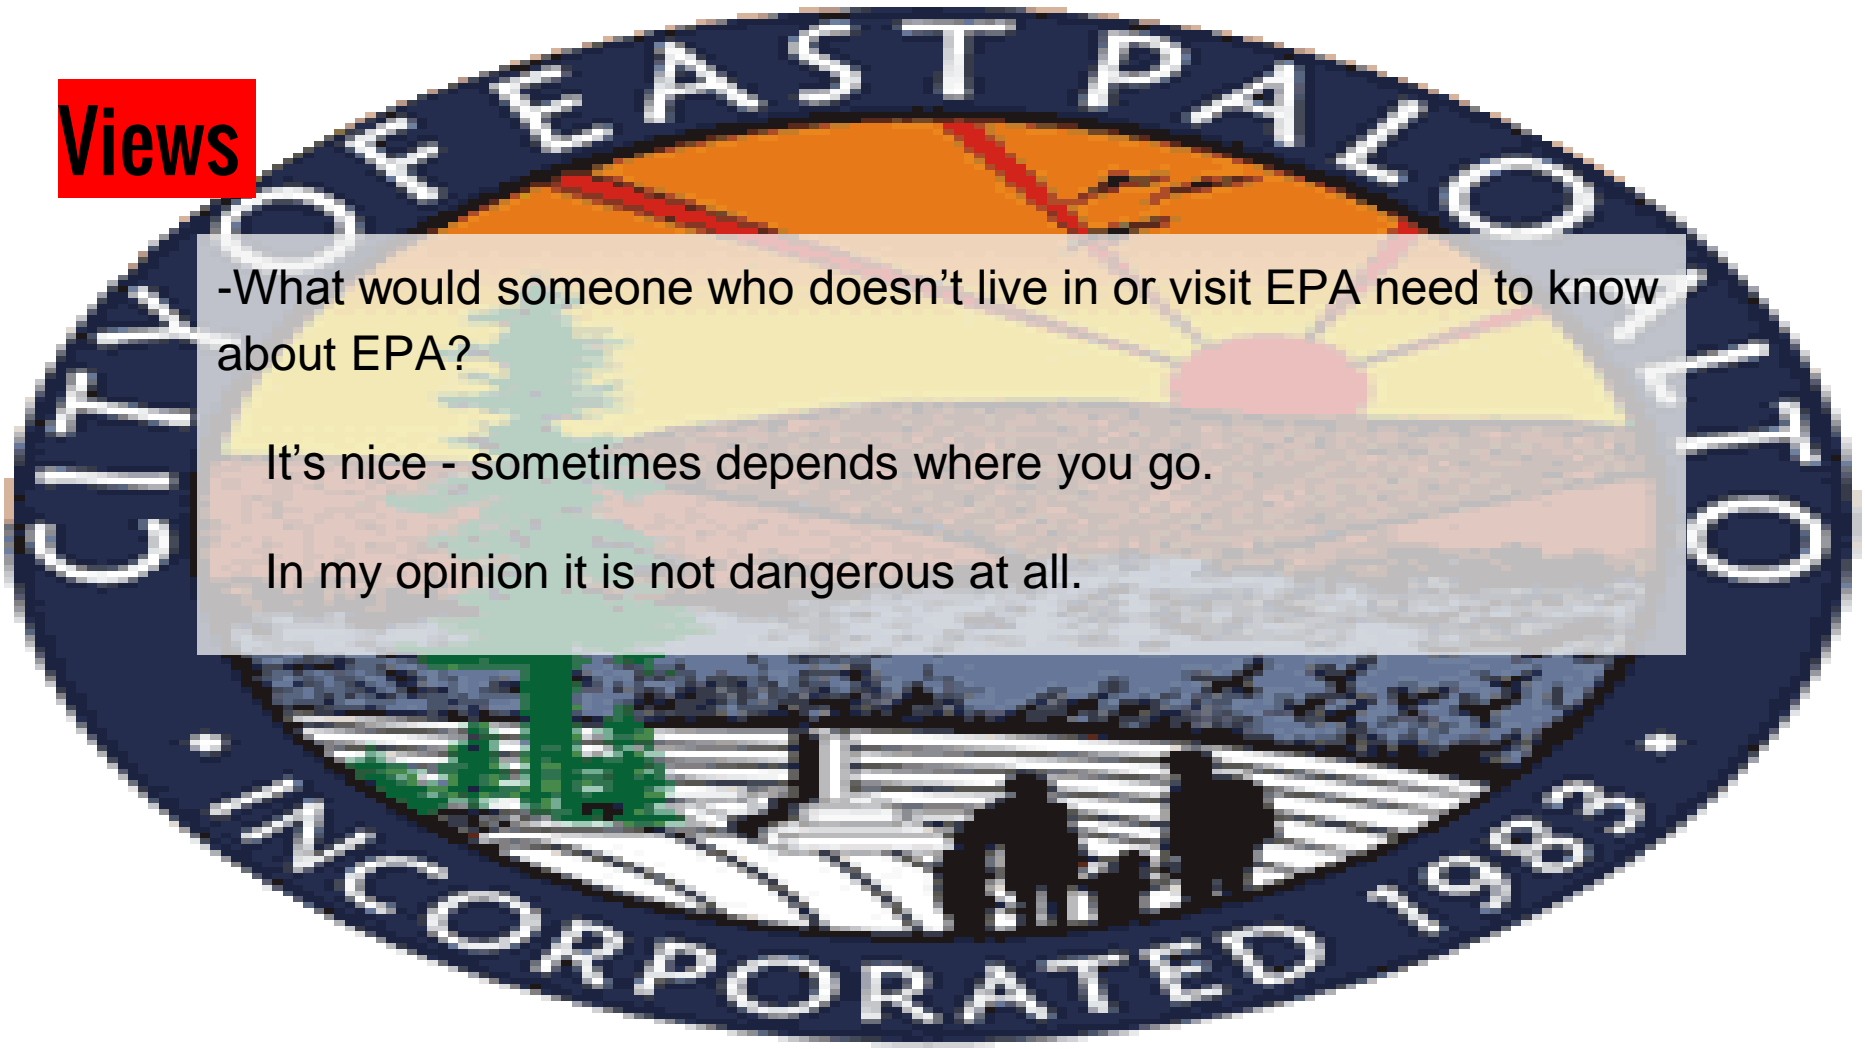

Views

-What would someone who doesn't live in or visit EPA need to know about EPA?

It's nice - sometimes depends where you go.

In my opinion it is not dangerous at all.

Hopes about future

- It's going to affect people east of 101 because houses will be destroyed
- Reach out to our Governor to find a solution to our issue
- Find companies to help fund
- Have fundraiser for flood insurance
- Start a kickstarter help people relocate

KICKSTARTER

Solutions for our future

- Students can bike more
- Use less electricity to reduce greenhouse gasses
- Become more aware of this issue of SLR in our community
