Hi Jessie,

You can respond to them directly. I have not received any arborist report. Can you ask Bob about it (although it is not required if no roots are cut....)?

Good Morning Camille,

I received the below email from Deke and Corrin Brown last night, both directly as well as through our SWCA website. Have you received a copy of the arborists report for Lot 10 in regards to the pine trees that Deke and Corrin are referring to? I will be heading out to the site today, and will look at the caution tape that they are referring to. I haven't seen any caution tape to date, so I am curious to see what they are asking about. Once I have that information I can respond to them, or I can forward the information for you to respond. How would you like to handle that?

Thanks!

Jessie Henderson-McBean

Hi Jessie,
This is a copy of the email we sent to your office.
I hope you can help us.

Please come to visit 20 Woodcreek Ct., in the San Mateo Highlands.
We live right across the cul-de-sac at #15.

Chamberlain is coming too close for comfort !!! At least two Heritage Pine Trees are too close to the edge of the grading site. If they fall into the construction site it could compromise the 'in-floor' radiant heating system as well as the back patio. Please help us understand why they needed to remove the boulders that were holding up the trees. Why did they have to come onto the Bartel's property to put yellow caution tape around the trees if it was safe.

As we Shelter-in-Place and try to conduct business from our homes the noise and dust are getting to us. ENOUGH !!!
Thank you for any help you can offer,

deke & corrin brown
