COUNTY OF SAN MATEO PLANNING AND BUILDING DEPARTMENT

DATE: August 27, 2014

TO: Planning Commission

FROM: Planning Staff

SUBJECT: EXECUTIVE SUMMARY: Consideration of an amendment to the County

Subdivision Ordinance, and certification of a Negative Declaration, that revises lot dimension requirements in areas outside of the Coastal Zone.

County File Number: PLN 2013-00221 (Zomorrodi)

PROPOSAL

The project is an amendment to the County Subdivision Ordinance that only applies to areas outside of the Coastal Zone. The amendment would allow the creation of parcels with less than 100 feet of depth similar to the applicant's, who has requested the amendment in order to enable the subdivision of a parcel located at 2099 Sharon Road in West Menlo Park

On May 6, 2014, the Board of Supervisors reviewed the Planning Commission's recommendation to eliminate the minimum lot depth standard, and remanded the proposal to the Planning Commission for further study. Specifically, the Planning Commission was asked to address the impacts of increased subdivision potential on local communities, and in areas with fire hazards or watercourses.

RECOMMENDATION

That the Planning Commission recommend that the Board of Supervisors approve a revised version of the submitted Subdivision Ordinance Amendment request that creates an exception to parcel depth requirements for sites that are corner lots, as defined by the zoning regulations, and certify the Negative Declaration, County File Number PLN 2013-00221, by adopting the required findings as contained in Attachment A.

SUMMARY

This report summarizes and addresses the issues discussed by the Supervisors and public speakers at the May 5, 2014, hearing. It has also prepared additional options for amending the Subdivision Regulations to allow the applicant's project to proceed. None of the new options would increase subdivision potential above that of the proposal

originally recommended for approval and studied in the Initial Study. In no case would the new options allow development in excess of that allowed by the General Plan.

As noted above, the issues of concern raised at the Board of Supervisors' hearing included the effect of infill development on existing landowners, fire safety, and the existing exception to lot dimension requirements for parcels containing watercourses.

The option recommended by the Planning and Building Department responds to these concerns by restricting the proposed exception to parcel design requirements to lots that meet the zoning regulation's definition of a corner lot. This revision eliminates any increase in subdivision potential in fire hazard areas, and reduces the overall number of new lots that can be created from 103 to 13.

The suggestion to supplement the amendment request in a manner that would eliminate areas within watercourses from counting toward minimum parcel size is unrelated to the applicant's proposal and would require an entirely new environmental analysis. While the Planning Department, therefore, does not recommend including it with the amendment proposed at this time, staff does plan on addressing this issue as part of the forthcoming comprehensive update to the current Subdivision Regulations.

COUNTY OF SAN MATEO PLANNING AND BUILDING DEPARTMENT

DATE: August 27, 2014

TO: Planning Commission

FROM: Planning Staff

SUBJECT: Consideration of an amendment to the County Subdivision Ordinance,

pursuant to Section 66411 of the California Government Code, and certification of a Negative Declaration, pursuant to the California Environmental Quality Act, that revises lot dimension requirements in

areas outside of the Coastal Zone.

County File Number: PLN 2013-00221 (Zomorrodi)

PROPOSAL

The project is an amendment to the County Subdivision Ordinance that only applies to areas outside of the Coastal Zone. The amendment is to allow the creation of parcels with less than 100 feet of depth similar to the applicant's, who has requested the amendment in order to enable the subdivision of a parcel located at 2099 Sharon Road in West Menlo Park.

The Board of Supervisors reviewed the Planning Commission's recommendation to eliminate the minimum lot depth standard and remanded the proposal to the Planning Commission for further study. Specifically, the Planning Commission was asked to address the impacts of increased subdivision potential on local communities, and in areas with fire hazards or watercourses.

The Planning Department has summarized and addressed the issues discussed by the Supervisors and public speakers at the hearing. It has also prepared additional options for amending the Subdivision Regulations. None of the new options would result in more new subdivision potential than the proposal originally recommended for approval by the Planning Commission and studied in the Initial Study. In no case would the new options allow development in excess of that allowed by the General Plan.

RECOMMENDATION

That the Planning Commission recommend that the Board of Supervisors approve a revised version of the submitted Subdivision Ordinance Amendment request that creates an exception to parcel dimension requirements for sites that are corner lots as defined by the Zoning Regulations, and certify the Negative Declaration, County File

Number PLN 2013-00221, by adopting the required findings as contained in Attachment A.

BACKGROUND

Report Prepared By: Steven Rosen, Project Planner, Telephone 650/363-1814

Applicant: Shahram Zomorrodi

Location: Unincorporated areas of San Mateo County outside of the Coastal Zone

Existing Zoning: Various

General Plan Designation: Various

Williamson Act: No parcel affected by this ordinance amendment is under a Williamson

Act Contract

Environmental Evaluation: An Initial Study and Negative Declaration were prepared for this project and circulated from October 23, 2013 to November 22, 2013.

Setting: Sites are scattered throughout the unincorporated communities of the Bayside.

DISCUSSION

A. KEY ISSUES

1. Board of Supervisors Hearing

On February 12, 2014, the Planning Commission recommended that the Subdivision Ordinance be amended to strike the minimum lot depth requirement of 100 feet for areas outside of the Coastal Zone. The basis of this recommendation was that the amendment would enable appropriate infill development, consistent with the General Plan Housing Element.

On May 6, 2014, the Board of Supervisors heard the Planning Commission's recommendation on the item, considered public testimony, and remanded the item to the Planning Commission for further study.

The public testimony at the Board of Supervisors hearing covered three topics. The first was that eliminating the minimum lot depth would result in overcrowding and lower resale prices for existing houses. The second is that doing so would reduce fire safety. The third is that the Board of Supervisors should also amend the Subdivision Ordinance to eliminate unbuildable land from the calculation of minimum lot area.

a. Infill Development

The prior staff reports and circulated Negative Declaration discussed the potential impacts of the new subdivision potential created by the amendment, and determined that the amendment does not increase density beyond that which is allowed by the General Plan, nor enable the creation of lots smaller than the minimum parcel size allowed in the zoning district. These documents also described the beneficial impact the proposed amendment will have toward fulfilling the goals and policies of the County's Housing Element.

At the Board of Supervisors hearing, a number of speakers raised concern about the effect that an increase in subdivision potential will have on their neighborhoods. Particular concerns were raised about the amendments effect on a property in West Menlo Park, at 2050 Santa Cruz Avenue, which was the site of a controversial subdivision proposal in 2005 that was eventually dropped by the applicant.

In response to these concerns, staff has analyzed the impact of the requested amendment on this site and concluded that it would allow the parcel to be divided into a maximum of four lots, whereas only three lots could be considered under the current regulations. The revised version of the amendment recommended by staff addresses this concern by limiting the exception to corner lots as defined by the Zoning Regulations. The parcel at 2050 Santa Cruz Avenue does not meet this definition.

b. Fire Safety

The Fire Marshal of the Woodside Fire Protection District identified concerns that eliminating the minimum lot depth requirement would prevent the creation of 100 feet of defensible space during construction or 30 feet of defensible space after construction. This is of concern in the Wildland-Urban Interface and in areas of moderate, high, and very high fire hazard severity.

Defensible space is area cleared of certain vegetation and organic surface litter in order to reduce the opportunity for wildfires to reach structures. In sites in the urban area of unincorporated San Mateo County, fire marshals typically require 100 feet of defensible space around construction and 30 feet of defensible space around completed structures. When this is not available, the space must extend to the property line.

This amendment would not affect the provision of defensible space because it will not reduce setback requirements or minimum lot area. Allowing exceptions to the 100 foot minimum lot depth requirement will not reduce

the amount of defensible space that must be established within required setbacks for new development.

The recommended revision to the requested amendment, which restricts the lot depth exception to corner lots as defined by the Zoning Regulations, also eliminates any increase in subdivision potential within Wildland Urban Interface areas of the County.

c. Excluding Watercourses from Minimum Area Calculations

The Board of Supervisors directed the Planning Commission to consider supplementing the Subdivision Ordinance Amendment in a manner that would eliminate areas within watercourses from counting toward minimum parcel size, as was suggested by speakers at prior hearings before the Planning Commission.

Such an amendment would require larger parcels in areas encumbered by watercourses, and thereby enhance opportunities to provide setbacks that preserve and enhance the County's watersheds and riparian habitats. However, it would need to be accompanied with the consideration of an amendment to the Zoning Regulations to address the correlation between larger parcel sizes and lager homes based on current Floor Area Ratio requirements. It would also entail defining which specific types of watercourses would be excluded, defining the boundaries of watercourses, and determining the appropriate method of codifying this change.

In light of the need to conduct these additional analyses, as well supplemental environmental review, staff does not recommend that the suggested modification be included in this amendment. It is the Planning Department's intention to address this issue as part of the forthcoming comprehensive update to the Subdivision Regulations, programmed for this fiscal year.

2. Options to Amend Subdivision Regulations

The Board of Supervisors directed the Planning Commission to study and recommend a response to the Fire Marshal's and other speaker's comments. The following options are submitted for consideration by the Planning Commission:

a. No Change to the Original Proposal

The Planning Commission recommended the original proposal to the Board of Supervisors on February 12, 2014. This option would strike the minimum lot depth requirement for areas outside of the Coastal Zone. Section 7020.2.c would read:

For areas outside of the Coastal Zone, the minimum width of each parcel shall conform to the requirements of the Zoning Regulations, but in no case shall be less than 50 feet, exclusive of rights-of-way or easements for road purposes. The minimum depth shall be as necessary to provide the minimum parcel size for the zoning district, exclusive of rights-of-way or easements necessary for road purposes.

For areas within the Coastal Zone, the minimum width of each parcel shall conform to the requirements of the Zoning Regulations, but in no case shall be less than 50 feet, exclusive of rights-of-way or easements for road purposes. The minimum depth shall be as necessary to provide the minimum parcel size for the zoning district, but in no case shall be less than 100 feet, nor greater than three times the width, exclusive of rights-of-way or easements necessary for road purposes.

This would create the potential to create the 103 new lots that could not otherwise be created. The sites that would gain potential are found in the following areas:

Unincorporated Community/ Neighborhood	Current Total of Existing and Potential Lots	Sites Gaining Subdivision Potential	New Lots Only Possible If this Alternative were Approved	Percentage Increase in Number of Lots
Broadmoor	1,462	1	1	0.07%
Burlingame Hills	485	0	0	0.00%
Country Club Park	58	0	0	0.00%
Devonshire	834	17	24	2.88%
Emerald Lake Hills	1,888	1	2	0.11%
Kensington Square	71	0	0	0.00%
Ladera	553	1	1	0.18%
Los Trancos Woods	425	7	9	2.12%
Menlo Oaks	277	0	0	0.00%
North Fair Oaks MFR	841	1	2	0.24%
North Fair Oaks SFR	1,987	3	3	0.15%
Palomar Park	302	2	2	1.32%
San Mateo Highlands	1,755	19	22	1.25%
Sequoia Tract	1,314	16	21	1.60%
Unincorporated Colma	31	1	1	3.23%
Weekend Acres	299	2	6	2.01%
West Menlo Park	1,497	6	8	0.60%
Total	14,079	77	103	0.73%

Staff Recommendation

The elimination of the lot depth requirement will not affect the provision of defensible space or result in density in excess of that allowed by the General Plan. It would improve the Subdivision Ordinance by simplifying the code and eliminating unnecessary requirements. However, it would increase development potential more than necessary to accomplish the applicant's goals, and would not address the concerns of community members expressed at the Board of Supervisors hearing. Therefore, it is not preferred over the option discussed in Section 2.b, below.

b. Add a New Exception

An exception to the minimum lot requirement for corner lots, as defined by Section 6102.55 of the Zoning Regulations, would achieve the objectives of the applicant, as well as the County's Housing Element by increasing the possible number of infill lots and associated housing units by 13, as compared to what is allowed under current regulations. It would also eliminate any increase in subdivision potential within the Wildland Urban Interface, or on the site in West Menlo Park that was of concern to many of the speakers at the Board of Supervisors hearing. This modification would do away with the proposal to modify Section 7020.2.c and instead modify Section 7020.2.k to read:

Exceptions to Parcel Design Requirements

Exceptions to parcel design requirements may be granted, pursuant to Chapter 5, when:

- (1) The parcels are located on or adjacent to steep hillsides, rivers or creeks;
- (2) The parcels are to be used for commercial or industrial purposes; or
- (3) The proposed development consists of clustered housing, townhomes, condominiums or combinations thereof.

Exceptions to parcel depth requirements may be granted, pursuant to Chapter 5, when the site being subdivided is located outside of the Coastal Zone and is a corner lot as defined by Section 6102.55 of the Zoning Regulations; i.e., a lot not greater than one hundred (100) feet in width and located at the junction of two (2) or more intersecting streets.

The result of this alternative would be a very small increase in the potential to subdivide lots. Only 13 lots in the unincorporated area would gain the

potential to be subdivided. None of these lots are in the mapped fire hazard areas.

Unincorporated Community/ Neighborhood	Current Total of Existing and Potential Lots	Sites Gaining Subdivision Potential	New Lots Only Possible If this Alternative were Approved	Percentage Increase in Number of Lots
Broadmoor	1,462	1	1	0.07%
Burlingame Hills	485	0	0	0.00%
Country Club Park	58	0	0	0.00%
Devonshire	834	2	2	0.24%
Emerald Lake Hills	1,888	0	0	0.00%
Kensington Square	71	0	0	0.00%
Ladera	553	0	0	0.00%
Los Trancos Woods	425	0	0	0.00%
Menlo Oaks	277	0	0	0.00%
North Fair Oaks MFR	841	0	0	0.00%
North Fair Oaks SFR	1,987	3	3	0.15%
Palomar Park	302	0	0	0.00%
San Mateo Highlands	1,755	0	0	0.00%
Sequoia Tract	1,314	5	5	0.38%
Unincorporated Colma	31	1	1	3.23%
Weekend Acres	299	0	0	0.00%
West Menlo Park	1,497	1	1	0.07%
Total	14,079	13	13	0.09%

Staff Recommendation

This would allow the division of the applicant's parcel at 2099 Sharon Road and significantly minimize the number of other lots that would gain subdivision potential by more narrowly defining the situations in which a lot may have less than 100 feet of depth. It will also eliminate any increase in subdivision within Wildland Urban Interface areas of the County, and on the site of concern at 2050 Santa Cruz Avenue. Therefore, this is the option recommended by staff.

c. <u>Limit the Proposal to the Site's Zoning District</u>

The applicant's site is located in the S-72 Zoning District. The entire S-72 Zoning District is outside of the Fire Hazard Severity Zone. To limit the change to the Subdivision Ordinance to this single zoning district would prevent this proposal from taking effect in mapped fire risk areas.

For areas outside of the Coastal Zone, Section 7020.2.c would read:

For areas outside the Coastal Zone, the minimum width of each parcel shall conform to the requirements of the Zoning Regulations, but in no case shall be less than 50 feet, exclusive of rights-of-way or easements for road purposes. In the S-72 Zoning District, the minimum depth shall be as necessary to provide the minimum parcel size for the zoning district, but in no case shall be greater than three times the width, exclusive of rights-of-way or easements necessary for road purposes. In all other Zoning Districts, the minimum depth shall be as necessary to provide the minimum parcel size for the zoning district, but in no case shall be less than 100 feet, nor greater than three times the width, exclusive of rights-of-way or easements necessary for road purposes.

For areas within the Coastal Zone, Section 7020.2.c would read:

For areas within the Coastal Zone, the minimum width of each parcel shall conform to the requirements of the Zoning Regulations, but in no case shall be less than 50 feet, exclusive of rights-of-way or easements for road purposes. The minimum depth shall be as necessary to provide the minimum parcel size for the zoning district, but in no case shall be less than 100 feet, nor greater than three times the width, exclusive of rights-of-way or easements necessary for road purposes.

This would reduce the number of sites that could potentially gain the potential to be subdivided to 8, found only in West Menlo Park:

Unincorporated Community/ Neighborhood	Current Total of Existing and Potential Lots	Sites Gaining Subdivision Potential	New Lots Only Possible If this Alternative were Approved	Percentage Increase in Number of Lots
Broadmoor	1,462	0	0	0.00%
Burlingame Hills	485	0	0	0.00%
Country Club Park	58	0	0	0.00%
Devonshire	834	0	0	0.00%
Emerald Lake Hills	1,888	0	0	0.00%
Kensington Square	71	0	0	0.00%
Ladera	553	0	0	0.00%
Los Trancos Woods	425	0	0	0.00%
Menlo Oaks	277	0	0	0.00%
North Fair Oaks MFR	841	0	0	0.00%
North Fair Oaks SFR	1,987	0	0	0.00%
Palomar Park	302	0	0	0.00%
San Mateo Highlands	1,755	0	0	0.00%

Unincorporated Community/ Neighborhood	Current Total of Existing and Potential Lots	Sites Gaining Subdivision Potential	New Lots Only Possible If this Alternative were Approved	Percentage Increase in Number of Lots
Sequoia Tract	1,314	0	0	0.00%
Unincorporated Colma	31	0	0	0.00%
Weekend Acres	299	0	0	0.00%
West Menlo Park	1,497	5	8	0.60%
Total	14,079	5	8	0.06%

Staff Recommendation

This would address the comments made by the Woodside Fire Marshal. It would limit the number of sites gaining development potential, but it would concentrate all the gains to one small neighborhood. Applying the change to the S-72 Zoning District and not to other, similar zoning districts is, therefore, not recommended by staff.

d. Limit the Proposal to Areas of Low Fire Hazard

The Subdivision Ordinance could be amended to eliminate the minimum lot depth from areas outside of State-designated fire risk areas.

For areas outside of the Coastal Zone, Section 7020.2.c would read:

For areas outside the Coastal Zone, the minimum width of each parcel shall conform to the requirements of the Zoning Regulations, but in no case shall be less than 50 feet, exclusive of rights-of-way or easements for road purposes. In areas designated on the California Department of Forestry and Fire Protection's Fire Severity Zone Maps as Very High Risk, High Risk, and Medium Risk within State Responsibility Areas and Very High Risk within Local Responsibility Areas, the minimum depth shall be as necessary to provide the minimum parcel size for the zoning district, but in no case shall be less than 100 feet, nor greater than three times the width, exclusive of rights-of-way or easements necessary to provide the minimum parcel size for the zoning district, but in no case shall be greater than three times the width, exclusive of rights-of-way or easements necessary for road purposes.

For areas within the Coastal Zone. Section 7020.2.c would read:

For areas within the Coastal Zone, the minimum width of each parcel shall conform to the requirements of the Zoning Regulations, but in no case shall be less than 50 feet, exclusive of rights-of-way or easements for road

purposes. The minimum depth shall be as necessary to provide the minimum parcel size for the zoning district, but in no case shall be less than 100 feet, nor greater than three times the width, exclusive of rights-of-way or easements necessary for road purposes.

The following table shows the subdivision potential created by this amendment:

Unincorporated Community/ Neighborhood	Current Total of Existing and Potential Lots	Sites Gaining Subdivision Potential	New Lots Only Possible If this Alternative were Approved	Percentage Increase in Number of Lots
Broadmoor	1,462	1	1	0.07%
Burlingame Hills	485	0	0	0.00%
Country Club Park	58	0	0	0.00%
Devonshire	834	0	0	0.00%
Emerald Lake Hills	1,888	1	2	0.11%
Kensington Square	71	0	0	0.00%
Ladera	553	1	1	0.18%
Los Trancos Woods	425	0	0	0.00%
Menlo Oaks	277	0	0	0.00%
North Fair Oaks MFR	841	1	2	0.24%
North Fair Oaks SFR	1,987	3	3	0.15%
Palomar Park	302	0	0	0.00%
San Mateo Highlands	1,755	0	0	0.00%
Sequoia Tract	1,314	16	21	1.60%
Unincorporated Colma	31	1	1	3.23%
Weekend Acres	299	2	6	2.01%
West Menlo Park	1,497	6	9	0.60%
Total	14,079	32	46	0.33%

Staff Recommendation

This option would respond to the Woodside Fire Marshal's comments, but would make the County's Subdivision Regulations beholden to changes made at irregular intervals by the California Department of Forestry's Fire Resources Assessment Program. This would be difficult to implement because changes to the maps would take time to incorporate into County map resources, and could come unannounced after the Planning Department accepts a subdivision application. Also, the fire hazard area boundaries are not coterminous with zoning boundaries. This could result in different rules applying within the same neighborhood.

This alternative also would not address the public's concerns regarding the impacts of increased development on the quality of their neighborhood or value of their home. Therefore, this option is not recommended.

e. Deny the Proposal

Denying the proposal would prevent the applicant's subdivision from moving forward. While it would alleviate all concerns raised at the Board of Supervisors hearing on the item, it would not provide an opportunity to increase the amount of appropriate infill development as called for by the County's General Plan Housing Element. The option in Section 2.b above alleviates the concerns raised at the Board of Supervisors hearing, while allowing the applicant's proposed subdivision, as well as a modest number of subdivisions on similarly situated urban parcels, to be considered. Therefore, the Planning Department does not recommend denial of the project.

B. **ENVIRONMENTAL REVIEW**

An Initial Study and Negative Declaration were prepared for this project and circulated from October 23, 2013 to November 22, 2013. As of the publication of this staff report, no comments on the adequacy or accuracy of the document have been received. None of the options above would result in more potential for new development than the proposal originally analyzed. Therefore, no new California Environmental Quality Act (CEQA) analysis is required.

RECOMMENDED FINDINGS

Permit or Project File Number: PLN 2013-00221 Hearing Date: August 27, 2014

Prepared By: Steven Rosen For Adoption By: Planning Commission

Project Planner

RECOMMENDED FINDINGS TO THE BOARD OF SUPERVISORS

Regarding the Negative Declaration, Find:

- 1. That the Board of Supervisors does hereby find that this Negative Declaration reflects the independent judgment of San Mateo County.
- 2. That the Negative Declaration is complete, correct, and adequate and prepared in accordance with the California Environmental Quality Act (CEQA) and applicable State and County Guidelines.
- 3. That, on the basis of the Initial Study, comments received hereto, and testimony presented and considered at the public hearing, there is no substantial evidence that the project will have a significant effect on the environment.

Regarding the Subdivision Ordinance Amendment, Find:

- 4. That the proposed Subdivision Ordinance amendment will conform to the General Plan Land Use designations in that the proposal will not create the potential for any unincorporated community or neighborhood to exceed the maximum density for its designation.
- 5. That the proposed Subdivision Ordinance amendment will enact policies of the Visual Quality, Urban Land Use, and Housing Elements of the County Master Plan (i.e., 1986 General Plan) in that: (1) it will allow more flexibility in the division of lots to create attractive building sites that are harmonious with existing development; (2) it will eliminate a requirement that hinders the development of the unincorporated areas of the County to the density envisioned in the Land Use Element; and (3) it will increase the supply of housing in the unincorporated areas of the County.

RECOMMENDED FINDING FOR DENIAL

Permit or Project File Number: PLN 2013-00221 Hearing Date: August 27, 2014

Prepared By: Steven Rosen For Adoption By: Planning Commission

Project Planner

RECOMMENDED FINDING FOR DENIAL

Regarding the Subdivision Ordinance Amendment, Find:

1. That the proposed Subdivision Ordinance amendment will violate policies of the Visual Quality, Urban Land Use, and Housing Elements of the County Master Plan (i.e., 1986 General Plan) in that: (1) it would not maintain and improve upon the appearance and visual character of development in urban areas (Policy 4.35 - *Urban Area Design Concept*); (2) it would degrade the character of existing single-family areas (Policy 8.14 - *Land Use Compatibility*); (3) it will allow additional development in fire hazard areas (Policy 15.27 - *Appropriate Land Uses and Densities in Fire Hazard Areas*).

NOTICE OF INTENT TO ADOPT **NEGATIVE DECLARATION**

A notice, pursuant to the California Environmental Quality Act of 1970, as amended (Public Resources Code 21,000, et seq.), that the following project: Amendment to the Subdivision Ordinance to modify the lot dimension requirements by eliminating the minimum and maximum lot depth standards in areas outside of the Coastal Zone, when adopted and implemented, will not have a significant impact on the environment. ENDORSED
IN THE OFFICE OF THE
COUNTY CLERK RECORDER OF
SAN MATEO COUNTY, CALIF

FILED

OCT 18 2013

MARK CHURCH County Clerk

FILE NO.: PLN 2013-00221

OWNERS: Not Applicable

APPLICANT: Shahram Zomorrodi

ASSESSOR'S PARCEL NO.: Not Applicable

PROJECT LOCATION: Unincorporated areas of San Mateo County outside of the Coastal

Zone

PROJECT DESCRIPTION

The project is an amendment to the Subdivision Regulations that only applies to areas outside of the Coastal Zone. The proposed change to the text will modify Section 7020: Standard Subdivision Design Requirements within Article 2: Subdivision Design and Layout. Subsection 2.c of Section 7020 currently reads:

The minimum width of each parcel shall conform to the requirements of the Zoning Regulations, but in no case shall be less than 50 feet, exclusive of rights-of-way or easements for road purposes. The minimum depth shall be as necessary to provide the minimum parcel size for the zoning district, but in no case shall be less than 100 feet, nor greater than three times the width, exclusive of rights-of-way or easements necessary for road purposes.

The project will strike the minimum and maximum lot depth requirement for areas outside of the Coastal Zone. It will read:

For areas outside of the Coastal Zone, the minimum width of each parcel shall conform to the requirements of the Zoning Regulations, but in no case shall be less than 50 feet, exclusive of rights-of-way or easements for road purposes. The minimum depth shall be as necessary to provide the minimum parcel size for the zoning district, exclusive of rights-ofway or easements necessary for road purposes.

For areas within the Coastal Zone, the minimum width of each parcel shall conform to the requirements of the Zoning Regulations, but in no case shall be less than 50 feet, exclusive of rights-of-way or easements for road purposes. The minimum depth shall be as necessary to provide the minimum parcel size for the zoning district, but in no case shall be

less than 100 feet, nor greater than three times the width, exclusive of rights-of-way or easements necessary for road purposes.

This amendment would not change the minimum lot size required by the applicable zoning districts, and it would not reduce the minimum lot size of 5,000 square feet required by Subsection 7020(2.b) of the Subdivision Regulations. In no case would a subdivision be allowed that exceeds the site's designation on the General Plan Land Use Map.

FINDINGS AND BASIS FOR A NEGATIVE DECLARATION

The Current Planning Section has prepared the initial study for the above project and, based upon substantial evidence in the record, finds that:

- 1. The project will not adversely affect water or air quality or increase noise levels substantially.
- 2. The project will not have adverse impacts on the flora or fauna of the area.
- 3. The project will not degrade the aesthetic quality of the area.
- 4. The project will not have adverse impacts on traffic or land use.
- 5. In addition, the project will not:
 - a. Create impacts which have the potential to degrade the quality of the environment.
 - b. Create impacts which achieve short-term environmental goals to the disadvantage of long-term environmental goals.
 - c. Create impacts for a project which are individually limited, but cumulatively considerable.
 - d. Create environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly.

The County of San Mateo has, therefore, determined that the environmental impact of the project, as mitigated, is not significant.

MITIGATION MEASURES included in the project to avoid potentially significant effects:

No significant effects were identified. No mitigation measures are proposed.

RESPONSIBLE AGENCY CONSULTATION

Referrals sent to: None

INITIAL STUDY

The San Mateo County Current Planning Section has prepared the Environmental Evaluation of this project and has found that probable environmental impacts, as mitigated, are not significant. A copy of the initial study is attached.

REVIEW PERIOD: October 21, 2013 – November 19, 2013.

All comments regarding the correctness, completeness, or adequacy of this Negative Declaration must be received by the County Planning Department, 455 County Center, Second Floor, Redwood City, no later than 5:00 p.m., November 79, 2013.

- 4. Contact Person and Phone Number: Steven Rosen, 650/363-1814
- 5. **Project Location:** Unincorporated areas of San Mateo County outside of the Coastal Zone
- 6. **Assessor's Parcel Number and Size of Parcel:** Not applicable
- 7. **Project Sponsor's Name and Address:** Shahram Zomorrodi, 5636 Stevens Creek Boulevard, #376, Cupertino, CA 95014
- 8. **General Plan Designation:** Not applicable
- 9. **Zoning:** Not applicable
- 10. Description of the Project: The project is an amendment to the Subdivision Regulations that only applies to areas outside of the Coastal Zone. The proposed change to the text will modify Section 7020: Standard Subdivision Design Requirements within Article 2: Subdivision Design and Layout. Subsection 2.c of Section 7020 currently reads:

The minimum width of each parcel shall conform to the requirements of the Zoning Regulations, but in no case shall be less than 50 feet, exclusive of rights-of-way or easements for road purposes. The minimum depth shall be as necessary to provide the minimum parcel size for the zoning district, but in no case shall be less than 100 feet, nor greater than three times the width, exclusive of rights-of-way or easements necessary for road purposes.

The project will strike the minimum and maximum lot depth requirement for areas outside of the Coastal Zone. It will read:

For areas outside of the Coastal Zone, the minimum width of each parcel shall conform to the requirements of the Zoning Regulations, but in no case shall be less than 50 feet, exclusive of rights-of-way or easements for road purposes. The minimum depth shall be as necessary to provide the minimum parcel size for the zoning district, exclusive of rights-of-way or easements necessary for road purposes.

For areas within the Coastal Zone, the minimum width of each parcel shall conform to the requirements of the Zoning Regulations, but in no case shall be less than 50 feet, exclusive of rights-of-way or easements for road purposes. The minimum depth shall be as necessary to

provide the minimum parcel size for the zoning district, but in no case shall be less than 100 feet, nor greater than three times the width, exclusive of rights-of-way or easements necessary for road purposes.

This amendment would not change the minimum lot size required by the applicable zoning districts, and it would not reduce the minimum lot size of 5,000 square feet required by Subsection 7020(2.b) of the Subdivision Regulations. In no case would a subdivision be allowed that exceeds the site's designation on the General Plan Land Use Map.

11. Surrounding Land Uses and Setting: Not applicable

12. Other Public Agencies Whose Approval is Required: None

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages.

Aesthetics	Climate Change	Population/Housing
Agricultural and Forest Resources	Hazards and Hazardous Materials	Public Services
Air Quality	Hydrology/Water Quality	Recreation
Biological Resources	Land Use/Planning	Transportation/Traffic
Cultural Resources	Mineral Resources	Utilities/Service Systems
Geology/Soils	Noise	Mandatory Findings of Significance

EVALUATION OF ENVIRONMENTAL IMPACTS

- 1. A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
- 2. All answers must take account of the whole action involved, including off-site as well as onsite, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- 3. Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appro-

- priate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
- 4. "Negative Declaration: Less Than Significant with Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from "Earlier Analyses," as described in 5. below, may be cross-referenced).
- 5. Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration (Section 15063(c)(3)(D)). In this case, a brief discussion should identify the following:
 - a. Earlier Analysis Used. Identify and state where they are available for review.
 - b. Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
 - c. Mitigation Measures. For effects that are "Less Than Significant with Mitigation Measures Incorporated," describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
- 6. Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.
- 7. Supporting Information Sources. Sources used or individuals contacted should be cited in the discussion.

1.	AESTHETICS. Would the project:				
		Potentially Significant Impacts	Significant Unless Mitigated	Less Than Significant Impact	No Impact
1.a.	Have a significant adverse effect on a scenic vista, views from existing residential areas, public lands, water bodies, or roads?				X

Discussion: The proposed project is a Subdivision Text Amendment. No physical development is proposed. There will be no aesthetic impacts associated with this project. Every subdivision is a project pursuant to CEQA and will be analyzed upon application.

Source: Not applicable.

1.b.	Significantly damage or destroy scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?		X	
Discus	ssion: See discussion under Question 1.a.			
Source	e: Not applicable.	 		
1.c.	Significantly degrade the existing visual character or quality of the site and its surroundings, including significant change in topography or ground surface relief features, and/or development on a ridgeline?		X	
Discus	ssion: See discussion under Question 1.a.			
Source	e: Not applicable.			
1.d.	Create a new source of significant light or glare that would adversely affect day or nighttime views in the area?		X	
Discus	ssion: See discussion under Question 1.a.

1.e.	Be adjacent to a designated Scenic Highway or within a State or County Scenic Corridor?		X	
Discus	ssion: See discussion under Question 1.a.			
Source	e: Zoning and Parcel Maps.			
1.f.	If within a Design Review District, conflict with applicable General Plan or Zoning Ordinance provisions?		X	
	ssion: This project does not exempt subdival Plan, Design Review Guidelines, or any c	_	e Zoning Ordinance,	
Source	e: Project description.			
1.g.	Visually intrude into an area having natural scenic qualities?		X	
Discus	ssion: See discussion under Question 1.a.			
Source	e: Not applicable.			

2.	AGRICULTURAL AND FOREST RESOURCES. In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Department of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the State's inventory of forestland, including the Forest and Range Assessment Project and the Forest Legacy Assessment Project; and forest carbon measurement methodology provided in Forest Protocols adopted by the California Air Resources Board. Would the project:				
		Potentially Significant Impacts	Significant Unless Mitigated	Less Than Significant Impact	No Impact
2.a.	For lands outside the Coastal Zone, convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland) as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?				X

2.d.	For lands within the Coastal Zone, convert or divide lands identified as Class I or Class II Agriculture Soils and Class III Soils rated good or very good for artichokes or Brussels sprouts?				Х		
	Discussion: This project excludes the Coastal Zone. Source: Project scope.						
2.e.	Result in damage to soil capability or loss of agricultural land?				Х		
	ussion: The parcels with new potential for soce: List of Parcels with New Subdivision Pot		not agricultur	al land.			
2.f.	Conflict with existing zoning for, or cause rezoning of, forestland (as defined in Public Resources Code Section 12220(g)), timberland (as defined by Public Resources Code Section 4526), or timberland zoned Timberland Production (as defined by Government Code Section 51104(g))? Note to reader: This question seeks to address the economic impact of converting forestland to a non-timber harvesting use.				X		

Discussion: The parcels with new potential for subdivision are in developed urban areas, not timberland. None are in or near the TPZ District.

Source: List of Parcels with New Subdivision Potential and Zoning Maps.

3. AIR QUALITY. Where available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations. Would the project:

	Potentially Significant Impacts	Significant Unless Mitigated	Less Than Significant Impact	No Impact
3.a. Conflict with or obstruct implementation of the applicable air quality plan?				Х

Discussion: BAAQMD's guidelines say that, in order to make the required determination for plan-level impacts, lead agencies could consider the following questions.

Does the project support the primary goals of the Air Quality Plan (AQP)?
 The primary goals of the 2010 Bay Area Clean Air Plan (CAP), the current AQP to date, are to:

Attain air quality standards;

- Reduce population exposure and protecting public health in the Bay Area; and
- Reduce greenhouse gas emissions and protect the climate.

The project will allow the creation of 103 new building sites for 101 single-family residences and 2 two-family residences in areas already developed with similar housing. These areas are within a region that suffers a housing shortage and to which people commute. The new housing units provide opportunities to people employed in the region to live in the region, reducing vehicle miles travelled and making the use of alternative modes of transportation more likely. Vehicle Miles Traveled (VMT) reduction supports the primary goals of the CAP.

2. Does the project include applicable control measures from the AQP?

Agencies approving projects should require that they include all of the 55 air pollution control measures listed in the CAP that can feasibly be incorporated into the project design or applied as mitigation, or justify the reasons, supported by substantial evidence, why a measure or measures are not incorporated into the project. Projects that incorporate all feasible air quality plan control measures may be considered consistent with the 2010 CAP.

This project implements BAAQMD's Transportation Control Measure D-3: Local Land Use Strategies. It states, "Local governments are encouraged to update general plans and area plans to promote infill development and support land use that allows residents and workers to walk, bicycle, and take transit to reach destinations, instead of relying on private automobiles." The limited scope of this project will result in limited benefits when compared to a general plan update, but it will provide the tangible reductions in air pollutants discussed above. Other control measures do not apply to this minor amendment to the Subdivision Regulations.

3. Does the project disrupt or hinder implementation of any AQP control measures?

If approval of a project would not cause the disruption, delay or otherwise hinder the implementation of any air quality plan control measure, it may be considered consistent with the 2010 CAP. Examples of how a project may cause the disruption or delay of control measures include a project that precludes an extension of a transit line or bike path, or proposes excessive parking beyond parking requirements.

This project does not hinder the implementation of any other AQP control measures. Regarding land use: It will not change the character of the neighborhoods in which the new subdivisions would be, and it would not change the uses allowed on the sites. Regarding construction impacts: The unincorporated communities that will be affected by this project already have many dividable lots, so the project would not be introducing the potential for new construction projects into places where there was none.

Source: BAAQMD CEQA Guidelines.

3.b	. Violate any air quality standard or		Х
	contribute significantly to an existing or		
	projected air quality violation?		

Discussion: This project will not increase VMT. It will not cause population growth, but will accommodate it in areas closer to employment centers than far-flung exurbs. It will not introduce the potential for new construction projects in areas where there was no potential before. Construction-level impacts will be assessed during the project level environmental review.

Source: Project scope.

3.c.	Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable Federal or State ambient air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors)?				X		
Discussion: The resulting increase in potential density in the region is negligible. There are 2,097,834 housing units in the San Francisco Bay Area Air Basin. This project creates the potential to develop 105 new housing units. Housing units are not significant emitters of ozone precursors or particulate emissions. Source: Census, GIS Analysis.							
3.d.	Expose sensitive receptors to significant pollutant concentrations, as defined by BAAQMD?				X		
subdiv	ssion: This is a site-specific impact. It is in risions at this time. Each subdivision will be e: Project scope.			et of individual			
3.e.	Create objectionable odors affecting a significant number of people?				Χ		
	Discussion: See discussion under Question 3.d. Source: Project scope.

5.	CULTURAL RESOURCES. Would the project:						
		Potentially Significant Impacts	Significant Unless Mitigated	Less Than Significant Impact	No Impact		
5.a.	Cause a significant adverse change in the significance of a historical resource as defined in CEQA Section 15064.5?				Х		
Discussion: The proposed project is a Subdivision Text Amendment. No physical development is proposed. There will be no impacts to cultural, historical, or archaeological resources associated with this project. Every subdivision is a project pursuant to CEQA and will be analyzed upon application. Source: Not applicable.							
5.b.	Cause a significant adverse change in the significance of an archaeological resource pursuant to CEQA Section 15064.5?				Х		

Discussion: See discussion under Question 5.a. Source: Project scope.					
5.c.	Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?				X
Discussion: See discussion under Question 5.a. Source: Project scope.					
5.d.	Disturb any human remains, including those interred outside of formal cemeteries?				Х
Discussion: See discussion under Question 5.a.					

6. GEOLOGY AND SOILS. Would the project:

	. ,					
		Potentially Significant Impacts	Significant Unless Mitigated	Less Than Significant Impact	No Impact	
6.a.	Expose people or structures to potential significant adverse effects, including the risk of loss, injury, or death involving the following, or create a situation that results in:				Х	
	i. Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other significant evidence of a known fault?				X	
	Note: Refer to Division of Mines and Geology Special Publication 42 and the County Geotechnical Hazards Synthesis Map.					

Discussion: The proposed project is a Subdivision Text Amendment. No physical development is proposed. There will be no increase in exposure of people or structures to geological hazards associated with this project. Every subdivision is a project pursuant to CEQA and will be analyzed upon application.

Source: Not applicable.

	ii. Strong seismic ground shaking?				Х		
Discu	ssion: See discussion under Question 6.a.	i.					
Sourc	Source: Project scope.						
	iii. Seismic-related ground failure, including liquefaction and differential settling?				Х

Sourc	ce: Project scope.						
	iv. Landslides?				Х		
Discu	ssion: See discussion under Question 6.a.	i.					
Sourc	e: Project scope.						
	v. Coastal cliff/bluff instability or erosion?				Х		
	Note to reader: This question is looking at instability under current conditions. Future, potential instability is looked at in Section 7 (Climate Change).						
Discu	ssion: See discussion under Question 6.a.	i.					
Sourc	e: Project scope.						
6.b.	Result in significant soil erosion or the loss of topsoil?				Х		
Discussion: The proposed project is a Subdivision Text Amendment. No physical development is proposed. There will be no change to landforms that will result in adverse effects resulting from this project. Every subdivision is a project pursuant to CEQA and will be analyzed upon application. Source: Not applicable.							
6.c.	Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, severe erosion, liquefaction or collapse?				Х		
Discu	ssion: See discussion under Question 6.a.	i.					
Sourc	e: Project scope.						
6.d.	Be located on expansive soil, as noted in the 2010 California Building Code, creating significant risks to life or property?				Х		

Discussion: See discussion under Question 6.a.i. Source: Project scope.					
6.e.	Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater?				Х

Discussion: The proposed project is a Subdivision Text Amendment. No physical development is proposed. There will be development resulting from this project. Every subdivision is a project pursuant to CEQA and will be analyzed upon application.

Source: Not applicable.

7. CLIMATE CHANGE. Would the project:

		Potentially Significant Impacts	Significant Unless Mitigated	Less Than Significant Impact	No Impact
7.a.	Generate greenhouse gas (GHG) emissions (including methane), either directly or indirectly, that may have a significant impact on the environment?				Х

Discussion: The County of San Mateo Energy Efficiency and Climate Action Plan and the Energy and Climate Change Element of the General Plan were developed based on the land use designations in the Land Use Element of the General Plan. Because this project will not result in development that exceeds the density limits in the Land Use Element, the analysis of and mitigation for greenhouse gas emissions have already been completed.

This project may result in a reduction of greenhouse gas emissions. It will allow this region to accommodate more of the people who work here. This would reduce commute distances, reducing VMT and increasing the likelihood of the use of alternative means of transportation.

Source: Project scope.

7.b. Conflict with an applicable plan (including a local climate action plan), policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?			Х
--	--	--	---

Discussion: This project does not conflict with the County of San Mateo Energy Efficiency Climate Action Plan.

Source: CSMEECAP.

7.c.	Result in the loss of forestland or conversion of forestland to non-forest use, such that it would release significant amounts of GHG emissions, or significantly reduce GHG sequestering?				Х			
Discussion: The proposed project is a Subdivision Text Amendment. No physical development is proposed. There will be conversion of forestland, GHG release, or reduction of GHG sequestering, associated with this project. Every subdivision is a project pursuant to CEQA and will be analyzed upon application. Source: Not applicable.								
7.d.	Expose new or existing structures and/or infrastructure (e.g., leach fields) to accelerated coastal cliff/bluff erosion due to rising sea levels?				Х			
propos with gl applica	Discussion: The proposed project is a Subdivision Text Amendment. No physical development is proposed. This project will not result in increased exposure to sea level rise or flooding associated with global warming. Every subdivision is a project pursuant to CEQA and will be analyzed upon application.							
Sourc	e: Not applicable.							
7.e.	Expose people or structures to a significant risk of loss, injury or death involving sea level rise?				Х			
	ssion: See discussion under Question 7.de: Project scope.							
7.f.	Place structures within an anticipated 100-year flood hazard area as mapped on a Federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map?				Х			
Discu	ssion: See discussion under Question 7.d	_						
	e: Project scope.							
7.g.	Place within an anticipated 100-year flood hazard area structures that would impede or redirect flood flows?				X

8.I.	Inundation by seiche, tsunami, or mudflow?				Х	
	Discussion: See discussion under Question 8.a.					
Sour	ce: Project scope.					

9.	9. HYDROLOGY AND WATER QUALITY. Would the project:				
		Potentially Significant Impacts	Significant Unless Mitigated	Less Than Significant Impact	No Impact
9.a.	Violate any water quality standards or waste discharge requirements (consider water quality parameters such as temperature, dissolved oxygen, turbidity and other typical stormwater pollutants (e.g., heavy metals, pathogens, petroleum derivatives, synthetic organics, sediment, nutrients, oxygen-demanding substances, and trash))?				X

Discussion: The proposed project is a Subdivision Text Amendment. No physical development is proposed. This project will not impact hydrology or water quality. Every subdivision is a project pursuant to CEQA and will be analyzed upon application.

Source: Not applicable.

9.b.	Significantly deplete groundwater supplies or interfere significantly with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted)?			X			
Discussion: The project would not significantly deplete groundwater supplies. It would create the potential to develop 101 new single-family residences and two new duplexes on the entire Bayside of the County. These 103 parcels would result in a 0.9% increase over the 9,902 existing and 1,382 potential lots that currently exist in the areas studied, and an insignificant increase over the tens of thousands of parcels Countywide. This increase in impervious rooftops and driveways will have an insignificant effect on groundwater recharge. The 105 new housing units that could be built will not exceed the water usage expected in the General Plan. Source: General Plan Land Use Element, GIS Analysis.							
9.c.	Significantly alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner that would result in significant erosion or siltation on- or off-site?				Х		
	ssion: See discussion under Question 9.a. e: Project scope.						
9.d.	Significantly alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or significantly increase the rate or amount of surface runoff in a manner that would result in flooding onor off-site?				Х		
Discu	ssion: See discussion under Question 9.a.						
Sourc	e: Project scope.						
9.e.	Create or contribute runoff water that would exceed the capacity of existing or planned stormwater drainage systems or provide significant additional sources of polluted runoff?				X		
Discu	ssion: See discussion under Question 9.a.						
Sourc	Source: Project scope.						

9.f.	Significantly degrade surface or groundwater water quality?				Х	
	Discussion: See discussion under Question 9.a. Source: Project scope.					
9.g.	Result in increased impervious surfaces and associated increased runoff?				Х	
Discussion: See discussion under Question 9.a. Source: Project scope.						

10. LAND USE AND PLANNING. Would the project:					
		Potentially Significant Impacts	Significant Unless Mitigated	Less Than Significant Impact	No Impact
10.a.	Physically divide an established community?				Х
comm	Ission: The proposed project is a Subdivision of sed. This project will not impact circulation of nunity. Every subdivision is a project pursual ce: Not applicable.	or communica	tion within any	established	
10.b.	Conflict with any applicable land use plan, policy or regulation of an agency with jurisdiction over the project (including, but not limited to, the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect?				X

Discussion: The project will increase the development potential very slightly in certain unincorporated communities. The Planning Department used GIS to make a list of all parcels equal to or greater than twice the minimum parcel size and checked the dimensions of each parcel to determine how many would be divisible only if the ordinance amendment is approved. In no case would the new potential density of any unincorporated community exceed the density limits in the General Plan Land Use Element. In many cases, the existing and current potential densities allowed by the Zoning Regulations are less than the minimum density described in the General Plan. The slight increases in potential density created by this project would allow development to inch closer to attaining the minimum density.

Source: General Plan, Density Analysis.

C	Conflict with any applicable habitat conservation plan or natural community conservation plan?				Х		
Discussion: The proposed project is a Subdivision Text Amendment. No physical development is proposed. This project will not conflict with any habitat conservation plan or natural community conservation plan. Every subdivision is a project pursuant to CEQA and will be analyzed upon application. Source: Not applicable.							
	Result in the congregating of more than 50 people on a regular basis?				Х		
Discussion: The proposed project is a Subdivision Text Amendment. No physical development is proposed. This project will not result in the congregating of more than 50 people on a regular basis. Every subdivision is a project pursuant to CEQA and will be analyzed upon application. Source: Not applicable.							
	Result in the introduction of activities not currently found within the community?				Х		
Discussion: This project will not change the zoning of any parcel. The uses allowed on each parcel with increased potential for subdivision will remain the same. Source: Project scope, List of Parcels with Increased Potential for Subdivision.							
c ii a ii e c	Serve to encourage off-site development of presently undeveloped areas or increase development intensity of already developed areas (examples include the introduction of new or expanded public utilities, new industry, commercial facilities or recreation activities)?			Х			
Discussion: The parcels with new development potential are all within developed areas. In the affected areas, the mean increase in potential density is 0.05 dwelling units per acre. The density permitted would in all cases be less than the maximum allowed by the General Plan Land Use Element, and in some cases would be below the minimum allowed by the General Plan Land Use Element. Public facilities are sized to accommodate the maximum intensity allowed by the General Plan. Therefore, the increase in density is not significant. Source: Density Analysis.							
•	Create a significant new demand for nousing?				Х		
Discuss	sion: The project only affects residentially	zoned parcel	s. It would cre	eate housing.			
Source:	Source: Project scope.						

11.	MINERAL RESOURCES. Would the project	ect:			
		Potentially Significant Impacts	Significant Unless Mitigated	Less Than Significant Impact	No Impact
11.a.	Result in the loss of availability of a known mineral resource that would be of value to the region or the residents of the State?				Х
propos CEQA	ssion: The proposed project is a Subdivision sed. This project will not impact mineral resonant will be analyzed upon application. The proposed project is a Subdivision and will be analyzed upon application.				
11.b.	Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?				Х
	ssion: See discussion under Question 11.ace: Project scope.	ı. 			
12.	NOISE. Would the project result in:				
		Potentially Significant Impacts	Significant Unless Mitigated	Less Than Significant Impact	No Impact
12.a.	Exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?				Х
Discu	ssion: The proposed project is a Subdivision	on Text Amen	dment. No ph	ysical develop	ment is

Discussion: See discussion under Question 12.a.

Exposure of persons to or generation of excessive ground-borne vibration or ground-borne noise levels?

Source: Project scope.

12.b.

Χ

12.c.	A significant permanent increase in ambient noise levels in the project vicinity above levels existing without the project?		Х	
Discu	ssion: See discussion under Question 12.a	A.		
Sourc	e: Project scope.			
12.d.	A significant temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project?		Х	
Discu	ssion: See discussion under Question 12.a	λ.	l	
Sourc	e: Project scope.			
12.e.	For a project located within an airport land use plan or, where such a plan has not been adopted, within 2 miles of a public airport or public use airport, exposure to people residing or working in the project area to excessive noise levels?		Х	
Discu	ssion: See discussion under Question 12.a	À.	l	
Sourc	e: Project scope.			
12.f.	For a project within the vicinity of a private airstrip, exposure to people residing or working in the project area to excessive noise levels?		Х	
Discussion: See discussion under Question 12.a. Source: Project scope.				

13.	POPULATION AND HOUSING. Would the project:				
		Potentially Significant Impacts	Significant Unless Mitigated	Less Than Significant Impact	No Impact
13.a.	Induce significant population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through exten- sion of roads or other infrastructure)?			Х	

Discussion: The project will not result in any unincorporated community exceeding the density limits in the General Plan Land Use Element. A maximum of 105 new housing units could be created as a result of this project. San Mateo County currently has 271,031 housing units. This increase is less than 0.04%.

Source: 2010 Census, GIS Analysis.

13.b.	Displace existing housing (including low- or moderate-income housing), in an area that is substantially deficient in housing, necessitating the construction of replacement housing elsewhere?		Х
	of replacement housing elsewhere?		

Discussion: The project will allow the subdivision of 105 small lots that were not able to be divided before. In many cases, division of land requires that the existing housing unit be removed. However, the land would then be developed with a greater density of housing units, so the removal of the original unit would not necessitate the construction of replacement housing elsewhere.

Source: Project scope.

14. PUBLIC SERVICES. Would the project result in significant adverse physical impacts associated with the provision of new or physically altered government facilities, the need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:

		Potentially Significant Impacts	Significant Unless Mitigated	Less Than Significant Impact	No Impact
14.a.	Fire protection?			X	
14.b.	Police protection?			X	
14.c.	Schools?			X	
14.d.	Parks?			Х	
14.e.	Other public facilities or utilities (e.g., hospitals, or electrical/natural gas supply systems)?			X	

Discussion: The greatest increase in the number of lots in any of the unincorporated communities affected by this ordinance amendment would be a maximum of 2.9% in Devonshire. In no place would the General Plan Land Use Element density limit be exceeded. There is no evidence to suggest that the potential modest increase in the total number of housing units would significantly impact public services.

Source: GIS Analysis.

15.	RECREATION . Would the project:				
		Potentially Significant Impacts	Significant Unless Mitigated	Less Than Significant Impact	No Impact
15.a.	Increase the use of existing neighborhood or regional parks or other recreational facilities such that significant physical deterioration of the facility would occur or be accelerated?			X	

Discussion: The project will allow the construction of new housing units, which will bring new park users into the unincorporated communities. The increase will be less than significant. If deterioration of park facilities is directly correlated with the number of users, then Devonshire, the unincorporated community with the greatest increase in the number of lots over the existing number of lots, will see a 2.9% increase in the deterioration of its recreational facilities. The other affected communities will see a lower increase in the rate of deterioration.

Source: GIS Analysis.

15.b.	Include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?		X

Discussion: The project will not require the construction or expansion of recreation facilities. The growth will be within the levels planned for in the General Plan and the development will be within existing communities served by existing facilities.

Source: GIS Analysis, General Plan.

16. TRANSPORTATION/TRAFFIC. Would the project:

		Potentially Significant Impacts	Significant Unless Mitigated	Less Than Significant Impact	No Impact
16.a.	Conflict with an applicable plan, ordinance or policy establishing measures of effectiveness for the performance of the circulation system, taking into account all modes of transportation including mass transit and non-motorized travel and relevant components of the circulation system, including, but not limited to, intersections, streets, highways and freeways, pedestrian and bicycle paths, and mass transit?				X

Discussion: The project will not allow development beyond that planned to be accommodated by				
the General Plan Transportation Element. Source: GIS Analysis.				
Source. GIS Allalysis.	<u> </u>			
16.b. Conflict with an applicable congestion management program, including, but not limited to, level of service standards and travel demand measures, or other standards established by the County congestion management agency for designated roads or highways?				Х
Discussion: The project does not conflict with these standards. It allows the creation of a small number of lots scattered throughout the Bayside of the County that continue the existing pattern of development and allow the communities to be developed up to the density called for in the Land Use Element of the General Plan. The Transportation Element was developed alongside the Land Use Element to accommodate the transportation demand generated by the development envisioned in the Land Use Element. Therefore, the effect on level of service (LOS) will not conflict with the plan. The project does not entail any construction near roads named in the Transportation Element as congestion areas.				
Source: Transportation Element.	_			
16.c. Result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that results in significant safety risks?				Х
Discussion: This project does not entail change Source: Project scope.	s to the air trar	nsportation sys	stem.	
16.d. Significantly increase hazards to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?				Х
Discussion: The proposed project is a Subdivision Text Amendment. No physical development is proposed. This project will not result in changes to the circulation system. Each subdivision is a project pursuant to CEQA and will be analyzed upon application. Source: Not applicable.				
16.e. Result in inadequate emergency access?				Х
Discussion: See discussion under Question 16.d. Source: Project scope.				

			1	1		
16.f.	Conflict with adopted policies, plans, or programs regarding public transit, bicycle, or pedestrian facilities, or otherwise decrease the performance or safety of such facilities?				Х	
ments for ea	Discussion: Subdivisions are an opportunity for the County to demand dedications and improvements to the right-of-way and to transportation systems. Potential for improvements will be analyzed for each subdivision application. Source: Project description.					
16.g.	Cause noticeable increase in pedestrian traffic or a change in pedestrian patterns?				Х	
Discu	ssion: See discussion under Question 16.c	d.				
Sourc	ce: Project scope.					
16.h.	Result in inadequate parking capacity?				Х	
	Discussion: This change to the code will not allow development that does not conform to the Zoning Regulations parking requirements.

17.	UTILITIES AND SERVICE SYSTEMS. W	ould the proje	ct:		
		Potentially Significant Impacts	Significant Unless Mitigated	Less Than Significant Impact	No Impact
17.a.	Exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board?				Х
Discussion: The sites with new potential for subdivision are found in different utility and service districts. It is impossible to study the impact of individual subdivisions at this time. Each subdivision will be a project subject to CEQA. Source: Project scope.					
17.b.	Require or result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?				Х
Discussion: See discussion under Question 17.a. Source: Project scope.					

17.c.	Require or result in the construction of new stormwater drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?			X
	ssion: The sites are in various locations wit of individual subdivisions at this time. Each			
Sourc	e: Project scope.		 	
17.d.	Have sufficient water supplies available to serve the project from existing entitlements and resources, or are new or expanded entitlements needed?			Х
Discu	ssion: See discussion under Question 17.a	a.		
Sourc	e: Project scope.			
17.e.	Result in a determination by the waste- water treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?			Х
	ssion: See discussion under Question 17.8 e: Project scope.	a.		
17.f.	Be served by a landfill with insufficient permitted capacity to accommodate the project's solid waste disposal needs?			Х
Discu	ssion: See discussion under Question 17.8	ì.		
Sourc	e: Project scope.			
17.g.	Comply with Federal, State, and local statutes and regulations related to solid waste?			Х
	ssion: This is a site-specific impact. It is in risions at this time. Each subdivision will be		ct of individual	
Sourc	e: Project scope.		 	
17.h.	Be sited, oriented, and/or designed to minimize energy consumption, including transportation energy; incorporate water conservation and solid waste reduction measures; and incorporate solar or other alternative energy sources?			X

Discussion: Each subdivision will be a project subject to CEQA. The orientation, siting, and design of each subdivision will be analyzed when submitted.

Source: Project scope.

17.i. Generate any demands that will cause a public facility or utility to reach or exceed its capacity?

Discussion: See discussion under Question 17.a.

Source: Project scope.

18. MANDATORY FINDINGS OF SIGNIFICANCE.

		Potentially Significant Impacts	Significant Unless Mitigated	Less Than Significant Impact	No Impact
18.a.	Does the project have the potential to degrade the quality of the environment, significantly reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?				X

Discussion: The proposed project is a Subdivision Text Amendment. No physical development is proposed. This project will not result in environmental degradation, destruction of habitat, threats to the wild animal and plant life in the region, or the destruction of artifacts of California history. Every subdivision is a project pursuant to CEQA and will be analyzed upon application.

Source: Not applicable.

18.b. Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.)		Х
---	--	---

Discussion: This project makes a small change to the lot dimension standards in the Subdivision Ordinance. An analysis of all lots over twice the minimum lot size determined that the result would be that 101 single-family residence lots and 2 two-family residence lots could be created that could

not be created before. These lots would be in communities already categorized by these types of development. The analysis concluded that, if every subdividable lot in these communities were divided to create as many lots as possible, including both the lots affected by this ordinance and the lots currently subdividable, the resulting density would be below maximum densities allowed by the General Plan in each of these communities. Therefore, the cumulative effect would not be considerable, and the effect has already been studied and mitigated for in the Environmental Impact Report prepared for the General Plan.

Source: GIS Analysis, General Plan, General Plan EIR.

18.c.	Does the project have environmental effects which will cause significant adverse effects on human beings, either directly or indirectly?		Х	
	,			Į

Discussion: The project will change the lot dimension requirements in the Subdivision Regulations, resulting in the potential to develop 103 sites scattered throughout the Bayside's unincorporated communities to the potential density allowed by the General Plan Land Use Element and Zoning Code. These sites are within existing neighborhoods developed with lots of a similar size to the lots that would result from the newly allowed subdivisions. The effect of single-family houses or duplexes built in neighborhoods composed of other single-family houses or duplexes at the resulting density is less than significant. The effect of construction on the people nearby can be studied and mitigated better during the environmental review for each individual project based on each site's specific setting.

MITIGATION MEASURES		
	Yes	<u>No</u>
Mitigation measures have been proposed in project application.		Х
Other mitigation measures are needed.		Х
The following measures are included in the project plans or proposal 15070(b)(1) of the State CEQA Guidelines:	s pursuant to S	Section

DETERMINATION (to be completed by the Lead Agency).

On the basis of this initial evaluation:

X	I find the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared by the Planning Department.
	I find that although the proposed project could have a significant effect on the environment, there WILL NOT be a significant effect in this case because of the mitigation measures in the discussion have been included as part of the proposed project. A NEGATIVE DECLARATION will be prepared.
	I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.
