Pacifica exposure to sea level rise. Hwy 1 heavily impacted

The attached impact map indicates significant infrastructure exposure in Pacifica. Hwy 1 will be threatened in multiple locations and all county coast side traffic will be impacted.

The cost to move this infrastructure will be \$1 billion +.

A best practices analysis is needed for a solution that addresses the following needs:

- Follow the decisions made by elected city council members .
- Weigh localized and varied geology conditions. One size does not fit all
- What infrastructure will be threatened in the short term?
- Homes deserve to be saved.
- Local economies deserve to be saved.
- If unrelenting coastal erosion is tolerated, towns go dim and vitality disappears.

**Homeowners Pay  
to Move All This**
